Re: DOCKET NO. W-01303A-09-0343; SW-0303A-0-0343,
Wastewater Rate Design Examination

As a Sun City West, AZ resident I am requesting you do not allow full consolidation of all the EPCOR wastewater districts

We **cannot and should not** be required to subsidize other districts for poor planning and choices.

Thank you for your consideration and a vote to deny full consolidation of the EPCOR wastewater districts.

Respectfully yours,

Mary Jane Novi, Psy.D.

Subject:DO NOT ALLOW CONSOLIDATION
Date:Fri, 19 Sep 2014 12:00:50 -0700
From:NANCY <nanbobrealestate@cox.net>
Organization:Award Realty
To:cfraulob@azruco.gov

Dear Ms. Fraulob,

I originally sent this to Pat Quinn and the email came back as undeliverable, and then I got an automatic response saying he is out of the office for 10 days and to contact you,(RATHER CONFUSING), which I am doing. I am a Realtor for 26 years and am horrified that this could take place in the United States of America. Since when do the people that have paid their fair share for YEARS have to pay for those that did not do their due diligence when buying properties. SRES in my Realtor designations stands for "Senior Real Estate Specialist" in case you are wondering. If you think the market was bad and wrought with lots of Short Sales and Foreclosures, these past 5 years, just wait until all the people try to unload their homes at the same time; when this firestorm hits.

Very truly yours, Nancy Deutsch

We are opposed to full consolidation of all EPCOR wastewater districts. Sun City is the area standing to realize the most significant increase in cost and our population is least able to pay for this significant increase. This is unfair and we would like you to seriously consider what this increase would do to Sun City residents. When Del Webb built our houses, he factored into the cost of our houses this wastewater issue. The others did not experience the forward thinking of Del Webb and should be treated differently!

Subject: The proposal to consolidate all EPCOR wastewater districts.

Docket No. W-01303A-09-0343;SW-01303A-0-0343, Wastewater Rate Design Examination

When this issue was raised by AZ American Water the people spoke. A new company then takes over from another 'Country' and decides to do the same. No matter how you look at it, it's redundant and the people deserve better than this. When the majority of the people say NO.....then accept their decision.

In Oregon the people have voted NO for the same 'gas pumping' issue for years and it is continuously put on the ballot. Why? Their duly elected officials are controlled by 'others' and continue to harass the voters, trying to force a change. Is this the new technique by so-called committees, boards and commissions?

The waste of paper, time and energy spent on trying to appease corporations is appalling. LISTEN to the people. I listened last night at the meeting and it was very obvious that their voices gave very good arguments. When did local government get so large that it needs a middle voice to defend the people? The Arizona Corporation Commission much like the Arizona School Board is an overseer between the people and the Federal Government. Why? Departments have become Commissions that allow a few people to make decisions, rather than the people voting on what they desire. The former order of business worked just fine. A Department that felt the pulse of the people dealt with the Companies directly. With the current system we are FORCED to allow too many people to do our bidding. When Del Webb designed and built Sun City, it was to allow Seniors a place to live out their lives in comfortable weather, surroundings and affordable housing. Something went very wrong and fees have escalated beyond their income, i.e., utilities, rec dues, taxes and H.O.A. Ah yes progress can be called the culprit. However, those in decision making positions at the time of the inception of this wonderful city, were not aligned with its future. In other words, what yearly maintenance, revenue costs and growth census did they address? Were the overseers in sts* mode? Quite prevalent these days.

The whole concept of Sun City was for Seniors. We all know that the top of our Executive branch of government has cunningly taken the economy on a downhill ride to nowhere, affecting everyone. Add to that a population explosion in Arizona, which has placed the Seniors in the middle of an awkward situation. Sun City has no walls around it and borders Youngtown, Peoria and Glendale. While most Seniors pride themselves in caring for their properties, there are some that have left or became financially embarrassed.

In adding additional burdens via utilities, taxes (a whole grip of them on electric, telephone bills) is not the answer to a fulfilling life.

A viable plan to keep Sun City thriving in joy and dignity can be at the center of every Seniors life, if implemented by those who are elected with 'fresh' ideas.

I am adamantly opposed to the full consolidation of all EPCOR wastewater districts.
In quiet and confidence will be your strength!

Claudette Stenson

The Arizona Corporations Commission

Vote for full consolidation of EPCOR Wastewater Districts

The Residents of Verrado:

Respectfully urge the Commissioners of the Arizona Corporation Commission (ACC) to vote for full consolidation of the wastewater districts under EPCOR management in the Phoenix metro area to include:

Agua Fria, Anthem, Sun City, Sun City West

Justification:

Verrado and other Agua Fria ratepayers are...

Vote for full consolidation of EPCOR Wastewater Districts

The Residents of Verrado:

Respectfully urge the Commissioners of the Arizona Corporation Commission (ACC) to vote for full consolidation of the wastewater districts under EPCOR management in the Phoenix metro area to include:

Agua Fria, Anthem, Sun City, Sun City West

Justification:

Verrado and other Agua Fria ratepayers are unduly impacted by the current deconsolidated structure, paying 300% of normal rates for Metro Phoenix

That deconsolidated rates are negatively impacting the financial health of each affected ratepayer

That deconsolidated rates are negatively impacting the growth and development of our community

That everyone benefits from the growth and development of greater Phoenix, and that fully consolidated cost-sharing, where feasible, is fair and reasonable.

Simplified rate structure with full consolidation works to the long-term advantage of all ratepayers, regardless of district

Costs of future repairs, upgrades, maintenance, and growth will be distributed across a much larger ratepayer group with full consolidation, reducing the impact to any single ratepayer

Sincerely,

Lea Jones

Subject: Wastewater Rate

**DOCKET NO. W-01303A-09-0343; SW-0303A-0-0343,
Wastewater Rate Design Examination**

From figures supplied from EPCOR, if the full consolidation of wastewater districts is approved, the affected cities' residents would have their wastewater costs increase from -54% to +243%. Raising Sun City residents' cost 89% seems to disproportionately negatively affect people on fixed incomes, especially those who have lived in Sun City for many years. Isn't there some way to make this change more equitably or over time?

EPCOR noted in their ACC response they have projected additional capital improvement costs for the Sun City District of \$9.3M over the next five years. If a full consolidation were to take place, Sun City users would be required to pay an additional \$22.5M over the noted five-year period. This equates to subsidizing other district costs in the amount of \$13.2M. We should not be required to subsidize other districts for poor planning and choices.

Thank you for your consideration and a vote to deny full consolidation of the EPCOR wastewater districts.

Respectfully yours,

Subject: Epcot Water Rates

It took careful planning for me to be able to move to Sun City West. My planning and budgeting have been hit by a lot of increases and the reduction of my house value. This retirement community should not be hit with costs that simply accommodate others. We cannot afford it. I conserve water and have taken out yard plants that require a watering system, yet have very little control over the monthly bill. Raising the costs to Sun City West was not part of the decision to move here.

Please say "no" to such impacts on us.

Thank You.

Subject: W-01303A-09-0343 Full Consolidation of EPCOR Water Districts

Dear Commissioner Bob Burns,

As a resident of Verrado/Buckeye, Arizona, I'm hoping that you are familiar with the current conditions of the Aqua Fria Epcor water district as it affects all Verrado ratepayers.

Verrado's Water Action Committee, a group of concerned Verrado residents, is promoting an awareness campaign directed to all Verrado residents/ratepayers, our elected state officials, and you our elected Corporation Commissioners.

Currently, the wastewater portion of our Epcor water bill is \$106.21 a month. This is scheduled to increase to \$121.91 on January 1. This high amount is due to past deconsolidation of the Agua Fria water district. As you can see by the attached chart, the Verrado residents would be in favor of full consolidation.

This is how the dollars and cents actually break down:

(Sun City has the largest volume of ratepayers, and their monthly wastewater bills are currently \$18.11 apiece. They decry a potential 89% increase in their bills with full consolidation, with bills rising from \$18.11 to \$34.30. That sounds outrageous. However, at this time the Verrado bills are 586% of Sun City's \$18.11 monthly bills. In January, that percentage will increase to 673% of their \$18.11 monthly bills. That makes 89% look pretty paltry. Right now Sun City residents pay \$217.32 a year for their wastewater service. Currently Verrado residents pay \$1,274.52 per year, and that will increase to \$1,462.92 on January 1. And this is for the same wastewater service as Sun City enjoys.

You may ask what is in it for Sun City to agree to full consolidation? As a retiree on a fixed income, I understand that these persons would not want to have a \$16.19 increase in their monthly utility bills. However, when the infrastructure for their sewer and water lines become in great need of repair in the not-too-distant future since their neighborhood is over 50 years old, my guess is they might want someone to help share the cost of that potentially exorbitant repair bill. If our communities remain deconsolidated at that time, I certainly hope no one at Sun City would ask for full consolidation to help cover their costs in a few years.

Full consolidation has the potential to be a win-win situation for all communities in Epcor's Agua Fria water district. Please consider this position and promote it to your fellow Arizona Corporation Commissioners.

Thank you,

Rebecca Blue

Wastewater Rate Design Examination

We support FULL consolidation of all EPCOR Wastewater Districts. I have records for our water bills in Corte Bella from 2007. In February, we paid \$53. In February of 2014, we paid \$143 - an increase of 170%. This is an unbelievable increase for retired people to swallow.

Corte Bella is currently consolidated into the Agua Fria Water/Wastewater District. The Agua Fria District is experiencing water/wastewater rates among the highest in the nation. It is our understanding that EPCOR Water Company has proposed full consolidation before the Arizona Corporation Commission as a means to remedy these exorbitant, discriminatory rates.

Since full consolidation, as proposed by EPCOR, would restore fair, just, and reasonable rates to all, we would like to go on the record as totally supporting FULL consolidation of all of EPCOR's wastewater districts. Thank you.

Michael Mandell

Subject: Docket 09-0343

Commissioner Burns,

I moved from Indiana to Arizona four years ago. My wife and I chose Arizona (and specifically Corte Bella) because this is where we decided we wanted to retire. I love living in Corte Bella, and in Arizona, but I believe a decision by the Arizona Corporate Commission a few years ago has created an unfair hardship on everyone in our community. We are part of the Agua Fria Water/Wastewater District, and the past decision to split apart our district caused our current water/wastewater rates to increase dramatically...until they are now among the highest in the entire nation.

EPCOR has proposed full consolidation of all water/wastewater districts before the Arizona Corporate Commission as a means to remedy these excessive, and discriminatory, rates. Full consolidation, as proposed by EPCOR, would restore fair, just, and reasonable rates for all its customers by distributing infrastructure costs more equitably. This sense of distributing the overall infrastructure burden more broadly has been used by other regulated utilities like electricity and telephone service, and ultimately it benefits all customers. (At some point every district needs to upgrade infrastructure. Distributing the costs over a larger customer base allows such upgrades to be done without imposing excessive rate increases on any one district.) The increased cost on other districts for complete consolidation is minimal, while the relief from excessive rates for the Agua Fria Water/Wastewater District is substantial.

As a result, I'm writing to urge you to support full consolidation of all EPCOR Wastewater Districts!

Sincerely

Dr. Charles Dyer

Subject: ACC dockets: SW-01303A-09-0343

Commissioner Burns,

As a resident of Verrado in the Agua Fria wastewater district, I am writing to urge you to support a vote for FULL CONSOLIDATION of the five EPCOR districts and for immediate rate relief to those of us who are facing some of the highest wastewater bills in the nation.

The Residential Utilities Consumer Office (RUCO), and other parties, would rather stall this process and delay any decision until a full rate case can be completed, an expensive venture that would delay relief a year or more. The irony here is that RUCO's argument also presents the biggest flaw in their thinking. Specifically, there is no rate case before the Commission at this time for wastewater, because EPCOR is ALREADY authorized to receive the total revenue described in their proposals. The decision on that point has already been made by the ACC. The question on the table now is whether we should continue as ratepayers to provide that revenue in a manner that is unfriendly both to consumers and to growth into an unwieldy system, or whether we should promote efficiency and economy of scale with a single and simplified rate structure. Should we continue to pit community against community in a bid to create winners and losers among individual ratepayers in providing an essential service? Or should we recognize that a strong and efficient utility provider is a solution which will benefit everyone in the long term? And all at the same revenue point already authorized to the provider. Agua Fria is ready to grow. As we speak, the Verrado community is preparing to add 4,000 new rooftops with no additional infrastructure requirement. This represents a tremendous influx of ratepayers and taxpayers to further bolster the economic health of everyone impacted. But we need growth-friendly policies to support and encourage buyers, or we risk falling flat. A \$121 wastewater charge contributing to a \$200-\$300 bill is antithetical to growth.

I'm not an attorney, and I'm not being paid to spend my time lobbying. I'm just a resident, trying to pay my bills and earn enough of a living to care for my family. Please, we need your help. We need your vote.

Sincerely,

Subject: Docket No. W-1303A-09-0343; SW-01303A-0-0343, Waste Water Rate Design Examination

I am the chairperson for Desert Bloom HOA and I am speaking for 20 residents, **we are opposed to full consolidation of all Epcor waste water** districts. We are all Seniors that are on fixed incomes and are struggling with the economy as it is now.

Two years ago, SW gas came and ran their cameras through our sewer to check their lines. They told me that our sewers are getting clogged and we should notify Epcor. Well, I tried and was told something would be done. Guess what...nothing was done. We have already had 3 units that had to go in and have their sewer lines redone at the tune of between 5 and 8 thousand dollars! We are in Phase one of Sun City and after 50 years the orange burgh that they used is collapsing.

We sympathize with these areas regarding their water costs, but we have our own problems.

Respectfully,
Betty Lust
Desert Bloom HOA Chairperson
Sun City, AZ 85351

We have lived in Verrado for over 5 years. The wastewater is the only reason we would consider moving. When we do sell, we will have a much harder time finding a buyer due to the outrageous water bill. This is not acceptable and should have never happened in the first place. This is the Arizona Corporation Commission's chance to make things right for all the homeowners and taxpayers they let down so horribly in the first place.

We are home owners in Sun City; addresses on Spruce, Sandstone and Tropicana. We are certainly opposed to water rate raises in an effort to buy wells for other districts.

Our wells were paid for within the cost of the properties in Sun City and forward thinking on the part of other districts would have been a prudent move. Their inability to think in a more prudent manner is their fault not ours. We vote against a rate increase and a consolidation of districts.

Yours truly,

Dave and Anne Sextro

Subject: Agua Fria Wastewater District - FULL CONSOLIDATION

Commissioner Burns,

As a resident of Verrado in the Agua Fria wastewater district, I am writing to urge you to support a vote for FULL CONSOLIDATION of the five EPCOR districts and for immediate rate relief to those of us who are facing some of the highest water bills in the nation.

The Residential Utilities Consumer Office (RUCO), and other parties, would rather stall this process and delay any decision until a full rate case can be completed, an expensive venture that would delay relief a year or more. The irony here is that RUCO's argument also presents the biggest flaw in their thinking. Specifically, there is no rate case before the Commission at this time for wastewater, because EPCOR is ALREADY authorized to receive the total revenue described in their proposals. The decision on that point has already been made by the ACC.

The question on the table now is whether we should continue as ratepayers to provide that revenue in a manner that is unfriendly both to consumers and to growth into an unwieldy system, or whether we should promote efficiency and economy of scale with a single and simplified rate structure. Should we continue to pit community against community in a bid to create winners and losers among individual ratepayers in providing an essential service? Or should we recognize that a strong and efficient utility provider is a solution which will benefit everyone in the long term? And all at the same revenue point already authorized to the provider.

Agua Fria is ready to grow. As we speak, the Verrado community is preparing to add 4,000 new rooftops with no additional infrastructure requirement. This represents a tremendous influx of ratepayers and taxpayers to further bolster the economic health of everyone impacted. But we need growth-friendly policies to support and encourage buyers, or we risk falling flat. A \$121 wastewater charge contributing to a \$200-\$300 bill is antithetical to growth.

I'm not an attorney, and I'm not being paid to spend my time lobbying. I'm just a resident, trying to pay my bills and earn enough of a living to care for my family. Please, we need your help. We need your vote.

Sincerely,

Herbert and Pamela Haack

Subject: Docket No. W-01303A-09-0343; SW-0303A-0-0343, Wastewater Rate Design Examination

Dear Mr Burns,

I am opposed to the full consolidation of all EPCOR wastewater districts!

I was opposed to it when Arizona Water attempted it a few years ago and nothing has changed. It is still grossly unfair to Sun City residents and will have a definite negative effect on the lives of many who live here. It also makes little to no business sense for EPCOR as it will not produce any savings to them and will not enable them to streamline any activities as each district is totally different from the others...apples and oranges.

I ask, then, why is this even being considered???

I fervently hope you will say no to EPCOR!

Sincerely,

Helen Tomich

Dear Commissioner:

We are seasonal residents of Verrado. Our home is vacant for the months of June through September. No water is being used inside the home during these months. Water used during these months is for outside landscaping irrigation only, which includes a grass lawn. As you can see from our bill of July 25, 2014, the water used during this billing period was 14,000 gallons, all of which was used for irrigation. However, we were charged for 7,000 gallons of wastewater treatment, none of which occurred, and in my opinion is a dishonest mischarging practice. In fact, when we are in Verrado, our inside water usage averages about 4,000 gallons a month. That means we are still being mischarged for 3,000 gallons per month of wastewater treatment for the months we are there. For this summer alone, I will be charged approximately \$250 for wastewater treatment that did not occur, and for the entire year it will be close to \$530. I urge you as a water district Commissioner to take decisive action to stop these mischarging practices and have Epcor Water Arizona Inc. structure billing commensurate with the services received.

Subject: Full Consolidation EPCOR Waste Water

Commissioner Burns,

As a resident of Verrado in the Agua Fria wastewater district, I am writing to urge you to support a vote for FULL CONSOLIDATION of the five EPCOR districts and for immediate rate relief to those of us who are facing some of the highest water bills in the nation.

The Residential Utilities Consumer Office (RUCO), and other parties, would rather stall this process and delay any decision until a full rate case can be completed, an expensive venture that would delay relief a year or more. The irony here is that RUCO's argument also presents the biggest flaw in their thinking. Specifically, there is no rate case before the Commission at this time for wastewater, because EPCOR is ALREADY authorized to receive the total revenue described in their proposals. The decision on that point has already been made by the ACC.

The question on the table now is whether we should continue as ratepayers to provide that revenue in a manner that is unfriendly both to consumers and to growth into an unwieldy system, or whether we should promote efficiency and economy of scale with a single and simplified rate structure. Should we continue to pit community against community in a bid to create winners and losers among individual ratepayers in providing an essential service? Or should we recognize that a strong and efficient utility provider is a solution which will benefit everyone in the long term? And all at the same revenue point already authorized to the provider.

Subject: Consolidation of Epcor's Wastewater Districts

Date: September 21, 2014

Dear Commissioner Burns,

As a long-time elected official myself, I clearly understand that certain policy issues can generate emotion on both sides and efforts to sway decision-making. I am a resident of Verrado, and I appeal to your sense of fairness and respect for good public policy on the issue of full consolidation of EPCOR's wastewater districts.

Article 15 of the Arizona Constitution, which charters and governs the ACC, states "no discrimination in charges, service, or facilities shall be made between persons or places for rendering a like and contemporaneous service". It is clear that EPCOR's wastewater district and pricing structure is the exact condition the Constitution sought to prevent. As we find ourselves in direct violation of this principle, swift and decisive action to set things right is the only appropriate course.

It is our understanding that Sun City has a flat usage rate, which we believe should be replaced with a rate structure that in part, at least, reflects the volume of water used. Consolidation should result in achieving variable rates that would be more equitable by including usage as a component. Furthermore, consolidation would help us all by encouraging users in Sun City to be judicious in their water usage.

As an elected official, you took an oath of office to uphold the Constitution of the State of Arizona, and my husband and I urge you to fulfill that oath. Your support in righting this situation by supporting full consolidation is respectfully encouraged.

Sincerely,
Phil and Carolyn

**Re: DOCKET NO. W-01303A-09-0343; SW-0303A-0-0343,
Wastewater Rate Design Examination**

As a Sun City, AZ property owner I am requesting you do not allow full consolidation of all the EPCOR wastewater districts. Based on the figures supplied by EPCOR, each Sun City wastewater user would experience a 90% rate increase if full-district consolidation was to be approved by the Commission.

EPCOR noted in their ACC response they have projected additional capital improvement costs for the Sun City District of \$9.3M over the next five years. If a full consolidation were to take place, Sun City users would be required to pay an additional \$22.5M over the noted five-year period. This equates to subsidizing other district costs in the amount of \$13.2M. We cannot and should not be required to subsidize other districts for poor planning and choices.

Thank you for your consideration and a vote to deny full consolidation of the EPCOR wastewater districts.

Respectfully yours,

John Cox

Dear Representative Bob Burns

Docket No. W-0303A-090343; SW-031303A-09-0343, Waste Water Rate Design Examination

This is to let you know as a constituent living in Sun City, I am OPPOSED to full consolidation of all EPCOR waste water districts.

This would be too punitive for many of us in Sun City who have retired over 20 years ago, living on a fixed retirement income and have seen all purchasing power decline and diminish our income. If waste water and water costs rise at the rate proposed, we would have to choose between washing and eating or replenishing medications.

I hope you will vote to defeat this measure as it will bring considerable hardships on our citizens of Sun City.

Thank you for ensuring this does not pass.

Subject: Response EPCOR's rates

Dear Commissioner,

We find it hard to understand why this commission is placing the burden of water improvement on the residents of Sun City West. This is a retirement community and everyone is on a FIXED income. Have all other plans been explored to have the costs shared with all who are affected with this proposal? We have no problem with a fair and just increase but the current proposal puts a huge burden on our income. In the information we have read , it appears there is some hidden issues that will make our future rates go to a much grater amount than is being discussed now.

We need to have an HONEST AND OPEN discussion on why we were singled out to have our rates increased. We strongly oppose the current rate hikes or any future improvements in the water system that will further burden our Sun City West community.

Thank you,

Gene and Jeanette Wilwert

Subject: Waste Water Rate Consolidation of Five Districts

Dear Commissioner;

I am opposed to any change to the Waste Water Rate Consolidation of Five Districts which includes Sun City West. Sun City West is a retirement community which has two or sometimes one resident. Our use of the waste water resources is minimal compared to the newer developments which have two or more residents and use a lot more of the waste water resources. Most of our water is used for irrigation and does not go down the sewer to the waste resources. We should not be expected to bear cost burdens over which we have no control. We paid for the costs at the time of construction of Sun City West and we should not bear the cost of additional constructions outside of our area.

Why shouldn't the cost of EPCOR's review be deducted from their profits. I cannot see why water waste rates are that high. Nowhere in the country are water waste rates that high. Is there miss management in that Company?

Sun City West did not seek to be involved in this rate case and we find no basis for their assessment of these charges.

I vehemently oppose the consolidation of Corte Bella into Sun City West or the consolidation of all the districts into one.

On another question, a few years ago the water company imposed a \$7.00 charge to our water bill to upgrade equipment for arsenic . When the equipment was paid for the charge was to come off the bill. It stayed as a separate item for a few years and then they merged the charge with the bill.

Subject: Epcor Full Consolidation

Commissioner Burns,

As a resident of Verrado in the Agua Fria wastewater district, I am writing to urge you to support a vote for FULL CONSOLIDATION of the five EPCOR districts and for immediate rate relief to those of us who are facing some of the highest water bills in the nation.

The Residential Utilities Consumer Office (RUCO), and other parties, would rather stall this process and delay any decision until a full rate case can be completed, an expensive venture that would delay relief a year or more. The irony here is that RUCO's argument also presents the biggest flaw in their thinking. Specifically, there is no rate case before the Commission at this time for wastewater, because EPCOR is ALREADY authorized to receive the total revenue described in their proposals. The decision on that point has already been made by the ACC.

The question on the table now is whether we should continue as ratepayers to provide that revenue in a manner that is unfriendly both to consumers and to growth into an unwieldy system, or whether we should promote efficiency and economy of scale with a single and simplified rate structure. Should we continue to pit community against community in a bid to create winners and losers among individual ratepayers in providing an essential service? Or should we recognize that a strong and efficient utility provider is a solution which will benefit everyone in the long term? And all at the same revenue point already authorized to the provider.

Agua Fria is ready to grow. As we speak, the Verrado community is preparing to add 4,000 new rooftops with no additional infrastructure requirement. This represents a tremendous influx of ratepayers and taxpayers to further bolster the economic health of everyone impacted. But we need growth-friendly policies to support and encourage buyers, or we risk falling flat. A \$121 wastewater charge contributing to a \$200-\$300 bill is antithetical to growth.

Wastewater Rate Design Examination

We support FULL consolidation of all EPCOR Wastewater Districts

We are residents of Corte Bella, a community served by EPCOR Water Company. Corte Bella is currently consolidated into the Aqua Fria Water/Wastewater District. The Aqua Fria District is experiencing water/wastewater rates among the **highest** in the nation. It is our understanding that EPCOR Water Company has proposed full consolidation before the Arizona Corporation Commission as a means to remedy these exorbitant, discriminatory rates.

Since full consolidation, as proposed by EPCOR, would restore fair, just and reasonable rates to all, we would like to go on the record as totally supporting FULL consolidation of all of EPCOR's wastewater districts.

Subject: EPCOR dockets SW-01303A-09-0343 and WS-01303A-14-0010

Commissioner Burns

Please do not consolidate five wastewater districts in EPCOR Water Arizona's service area.

Under the proposal Sun City homeowners could see an 89 percent increase in our sewer bills.

This SO adversely affects residents in Sun City, as you know most people living here are retired and live on a fixed income.

It has crossed many of our minds that it's possible EPCOR purchased the water company in this area with just this tactic, a quiet little company that could be mined for further profits.

Possibly please also consider that most homes in Sun City have only two residents (often only one) and the usage is much lower than say Anthem District which is more family-filled, using much higher quantities of water and causing much more wastewater.

Thank you for considering these points and please keep the fixed income factor in mind and the hardship it would cause when making your decision.

Anne Berndt

Subject: Do Not Support Full Consolidation re: Docket Numbers SW-01303A-09-0343 for the wastewater issue and WS-01303A-14-0010 for the water case

Dear Mr. Burns,

I am a Sun City resident that is widowed and on a fixed income. I do not support full consolidation and this has come to the forefront in reference to Docket Numbers SW-01303A-09-0343 for the wastewater issue and WS-01303A-14-0010 for the water case. When our home was built in Sun City, the wastewater and water systems costs were footed by the builder and this was included in the price of the house. Other builders have not done that. I am also alone, have medical problems, on fixed income, and the rising costs that full consolidation would make me bear, would limit me on my future as a homeowner and my own health. I am diligent in conserving water and therefore the wastewater is minimal. Full consolidation will cause hardship. I live in Sun City so I can manage on my limited income. I have worked hard all my life and have never depended on any government or outside help.

Please consider voting NO for Full Consolidation. This full consolidation would end up being a demise for myself and many other senior citizens, who are on fixed income with rising taxes and health care expenses.

I also had hoped to see you at the Sun City meeting at 1000 today when two candidates appeared. I missed your presence as I would have liked to have seen your response to questions and consideration re: to the Full Consolidation and other utility questions..

Respectfully,
Patricia A. Heimann

Specifically, there is no rate case before the Commission at this time for wastewater, because EPCOR is ALREADY authorized to receive the total revenue described in their proposals. The decision on that point has already been made by the ACC.

The question on the table now is whether we should continue as ratepayers to provide that revenue in a manner that is unfriendly both to consumers and to growth into an unwieldy system, or whether we should promote efficiency and economy of scale with a single and simplified rate structure. Should we continue to pit community against community in a bid to create winners and losers among individual ratepayers in providing an essential service? Or should we recognize that a strong and efficient utility provider is a solution which will benefit everyone in the long term? And all at the same revenue point already authorized to the provider.

Agua Fria is ready to grow. As we speak, the Verrado community is preparing to add 4,000 new rooftops with no additional infrastructure requirement. This represents a tremendous influx of ratepayers and taxpayers to further bolster the economic health of everyone impacted. But we need growth-friendly policies to support and encourage buyers, or we risk falling flat. A \$121 wastewater charge contributing to a \$200-\$300 bill is antithetical to growth.

I'm not an attorney, and I'm not being paid to spend my time lobbying. I'm just a resident, trying to pay my bills and earn enough of a living to care for my family. Please, we need your help. We need your vote.

Sincerely,

Susan Aceves

Subject: Agua Fria Wastewater District

Commissioner Burns,

As a resident of Verrado in the Agua Fria wastewater district, I am writing to urge you to support a vote for FULL CONSOLIDATION of the five EPCOR districts and for immediate rate relief to those of us who are facing some of the highest water bills in the nation.

The Residential Utilities Consumer Office (RUCO), and other parties, would rather stall this process and delay any decision until a full rate case can be completed, an expensive venture that would delay relief a year or more. The irony here is that RUCO's argument also presents the biggest flaw in their thinking. Specifically, there is no rate case before the Commission at this time for wastewater, because EPCOR is ALREADY authorized to receive the total revenue described in their proposals. The decision on that point has already been made by the ACC.

The question on the table now is whether we should continue as ratepayers to provide that revenue in a manner that is unfriendly both to consumers and to growth into an unwieldy system, or whether we should promote efficiency and economy of scale with a single and simplified rate structure. Wastewater Rate Design Examination

We support FULL consolidation of all EPCOR Wastewater Districts

We are residents of Corte Bella, a community served by EPCOR Water Company. Corte Bella is currently consolidated into the Agua Fria Water/Wastewater District. The Agua Fria District is experiencing water/wastewater rates among the highest in the nation. It is our understanding that EPCOR Water Company has proposed full consolidation before the Arizona Corporation Commission as a means to remedy these exorbitant, discriminatory rates.

Since full consolidation, as proposed by EPCOR, would restore fair, just and reasonable rates to all, we would like to go on the record as totally supporting FULL consolidation of all of EPCOR's wastewater districts.

Thank You!

Sincerely,

Don & Sandy Wherry

Epcor Wastewater Consolidation - Docket No. W-01303A-09-343: SW-01303A-0-343

I OPPOSE full wastewater consolidation.

Best Equitable Long Term Solution?

Epcor insists that the best equitable long-term solution is to consolidate all wastewater districts

thus spreading the costs of improvements to its aging infrastructure.

The oldest infrastructure of the districts is the Sun City and Sun City West districts. The other three districts are all newer districts with much newer infrastructure. The Sun City infrastructure was built by Dell Webb and paid for by the original Sun City residents. The other districts infrastructures were not built by Dell Webb and the residents of those districts are now paying for that infrastructure in the rates that they pay.

Subject: I Support Electric Competition

As an Arizona energy user, I urge you to support consumer choice by acting in favor of electric competition in Arizona.

With electric competition, families, businesses and government entities in our state will benefit from the right to choose their electric power supplier. Just as Arizonans can compare offers for other everyday goods and services based on price, product features and contract flexibility, they should be able to choose the best option for their electricity. In addition, Arizona's economy and environment will benefit from greater investment and innovation spurred by competition.

As a Goldwater Institute report summarized: "Only by moving Arizona's electricity industry closer to the ideal of an open and competitive market can the ingenuity of entrepreneurs be engaged to meet the increasing demand for electricity—the lifeblood of Arizona's economy."

Electric competition is already delivering benefits to residents in many other states. And it's long overdue here. Please act to implement electric competition in Arizona.

Thank you for your consideration.

Scott Groenewold

Tempe, AZ 85281
